

TM 1-phase 3-phase 50Hz

Submersible titanium sewawater pump

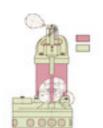

Vortex Impeller

This impeller is used mainly to avoid clogging or wear by large or stringy solids in the water. It accelerates part of the water to great speed, and this speed is used to smoothly move all the water from inlet to outlet.

Resistant to corrossion

All parts in contact with the medium are made of titanium. Titanium has a far stronger oxide film on its surface than stanless steel does. This prevents the pump from being corroded in the seawater which has a very high chlorine ion concentration.

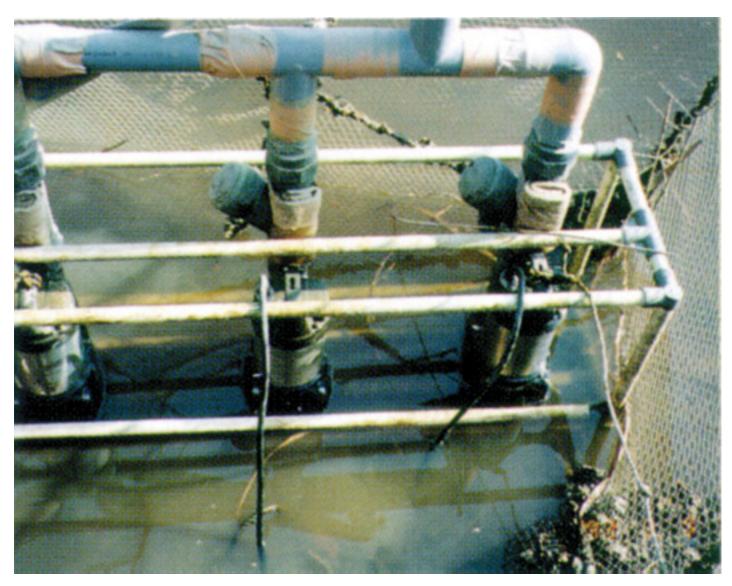

Stainlesse steel corrodes, titanium dosen't.

Specifications:

Model	Colour code curve		Boremm	Power output kW	Phases	r.p.m.	Head max. m	Capacity max. I/min	Starting method	Dry weight kg without cable	Impeller passage mm	
50TM2.4S		1	50	0,4	1	2850	12,0	290	condensor	6,7	10	
50TM2.75		2	50	0,75	3	2850	15,0	350	direct	7,8	10	

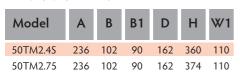

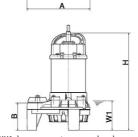

ø Discharge	bore mm		50mm				
Pumping Fluid	Temperatur	re	0-40°C				
riuia	Type of Flui	id	Saltwater, Seawater				
Pump	Compo- nents	Impeller	Vortex impeller				
	nents	Shaft Seal	Double mechanical seal				
		Bearings	Shielded ball bearings				
	Material	Impeller	Glass fibre reinforced plastic				
		Upper casing	Glass fibre reinforced plastic				
		Lower casing	Glass fibre reinforced plastic				
		Shaft Seal	Silicon carbide in oil bath				
Motor	Type, Poles		Induction motor, 2 poles, IP68				
	Lubrication		Turbine oil (ISO VG15)				
	Insulation		Insulation class E				
	Motor Prote	ector (built-in)	Circle thermal cut-out				
	Phase / Volt	age	Single phase 230V / 50Hz, 3-phase / 400V / 50Hz / d.o.l.				
	Material	Casing	Titanium				
		Shaft	Titanium				
		Cable	Rubber, 10m H07RN-F				
Discharge (Connection		Inside thread, flange				

Dimensions in mm:

W1: lowest running water level Please mind: discharge bend, duck foot bend and stand set are accessories and must be ordered separately

Contributing to World-wide Prosperity and Understanding through Worker- and Environment-friendly Production.

Designed for increased productivity through fully integrated streamlined production systems, Tsurumi 's factory in Kyoto (Japan) features a production capacity of a full 1 million pumps per year. Large-scale modern R&D facilities offer optimum conditions for experimenting and testing of even super-large pumps and for developing new products to expand the possibilites and applications of pumps. To provide optimum conditions for our main asset, our workers, as well as for the environment, special emphasis is placed on optimized working conditions with airconditioning, minimized dust and exhaust gas emission, comprehensive recycling and waste recovery.

We reserve the right to change specifications and designs herein for improvement without prior notice. Our pumps are for professional use only. In the event that Tsurumi (Europe) GmbH have, in exceptional cases taken over, a manufacturer's warranty, this entitles the enduser to assert remedy free of charge against Tsurumi (Europe) GmbH due to any defect to the product occurring during the guarantee period (see below), also then when the warranty claims against the seller do not or no longer exist. In the event of malfunction, which is attributable to the improper handling by the enduser, no guarantee claim shall arise. Further claims shall not result from the warranty, unless if something to the contrary has explicitly been determined. The decision as to whether remedy is effected by way of replacement or repair shall be at the choice of Tsurumi (Europe) GmbH. The claims shall be time barred after a period of three months after expiry of the guarantee period, however, not before expiry of the warranty period which is valid towards the seller. In the event of doubt, the warranty period shall correspond with the warranty period which is valid between the end-user and his seller.
