

SFQ 3-phase
50Hz

Stainless steel pump

The SFQ pump has been developed exclusively for corrosive liquids. Applying austenitic steel in all wetted parts, the SFQ pump is a highly specialised pump in terms of design and materials.

Vortex Impeller

This impeller is used mainly to avoid clogging or wear by large or stringy solids in the water. It accelerates part of the water to great speed, and this speed is used to smoothly move all the water from inlet to outlet.

Optional Accessories 5,5kW and above:

- Guide rail fitting consisting of:
 - Guide support / Guide hook
 - Duck foot bend
 - Lifting chain
