

TSURUMI PUMP

BZ 3-phase
50Hz

Sewage pump with non-clogging impeller - Solid passage 80mm

Non-clog impeller allows large diameter of foreign matter with respect to discharge bore. This ensures that waste water and sewage are efficiently transferred. The impeller comes out with the motor when the motor is removed from the pump casing (a back-pull-out design, upto 3, 7kW).

Non-clog impeller

80mm solid passage. A non-clog impeller allows large diameter of foreign matter with respect to discharge bore. This ensures that waste water and sewage are efficiently transferred.

Optional Accessories:

- Guide rail fitting consisting of:
 - Guide support / Guide hook
 - Duck foot bend
 - Lifting chain
- Discharge bend
- Stand for free standing type (5,5kW or over)
